必须要懂得合理用药

钟南山

我是一名临床呼吸道疾病专家

抗生素的使用不光是在医学方面，那么在农业方面，在畜牧业，在水产业都有使用抗生素。细菌耐药应该作为一个社会问题来看，这个是不但涉及到临床，也涉及到农业、畜牧业、水产业各个领域。在我们中国，已经开始有这样的一个行动，在国家的统一指导下，提出了遏制细菌耐药的行动计划，在2016年G20会议上把细菌耐药的问题提高到国家战略性的角度，需要各个部门共同配合来努力。

遏制细菌耐药，合理使用抗菌药物

THE CONCEPT OF RATIONAL DRUG USAGE

I am a specialist in clinical respiratory diseases.

Antibiotics are used not only in medical science, but also in agriculture, animal husbandry, and aquaculture. AMR should be treated as a social problem. This is not only related to clinical practice, but also to agriculture, animal husbandry, and aquaculture.

In China, we have started to take action. Under the guidance of the state, we have proposed some actions designed to address AMR. In 2016, the G20 has taken the problem of AMR to a national strategic level. This problem requires the efforts of all departments.
